1 Key to symbols and safety instructions

1.1 Key to symbols

Warnings

Warnings in this document are identified by a warning triangle printed against a grey background.

Keywords at the start of a warning indicate the type and seriousness of the ensuing risk if measures to prevent the risk are not taken.

The following keywords are defined and used in this document:

- **NOTICE** indicates a situation that could result in damage to property or equipment.
- **CAUTION** indicates a situation that could result in minor to medium injury.
- **WARNING** indicates a situation that could result in severe injury or death.
- **DANGER** indicates a situation that will result in severe injury or death.

Important information

This symbol indicates important information where there is no risk to people or property.

Additional symbols

Symbol	Explanation
▶	Step in an action sequence
→	Cross-reference to another part of the document
•	List entry
–	List entry (second level)

Table 1

1.2 Safety Information

If you smell gas:

- ▶ Close the gas supply valve to the appliance.
- ▶ Isolate gas supply from gas meter or LPG cylinder.
- ▶ Do not operate any electrical appliances or switches (on/off).
- ▶ Extinguish other sources of ignition.
- ▶ Go to a different location and call the gas supplier or an authorised technician in order to check the gas supply.

If you notice dark combustion gases or sooting:

- ▶ Isolate the gas supply to the heater.
- ▶ Notify an authorised technician.

Installation, assembly, and modifications

Installation, assembly, and modifications to the heater must only be performed by an authorised technician.

Maintenance

- ▶ The water heater is required to have a service and safety inspection every two years.
- ▶ The installer is responsible for the safety and environmental compatibility of the installation.
- ▶ The owner/user is responsible for keeping the area around the water heater free from debris.
- ▶ Safe access to inspect and service the water heater is the responsibility of the property owner.
- ▶ Use only genuine Bosch spare parts.

Explosive and flammable material

- ▶ Do not store or use flammable material (paper, spray cans, solvents, paints, etc) near the heater.

Combustion air and surrounding air

- ▶ The combustion air and surrounding air must be free from corrosive substances.
- ▶ Do not spray aerosols or use chemicals around the heater unless heater is disconnected from the power supply.

Risk of damage due to user error

User error can result in injury and damage to property.

- ▶ Ensure that children never play with or operate this appliance.
- ▶ Ensure that only personnel who can operate this appliance correctly have access to it.
- ▶ Refer to the operating and user instructions before adjusting the water heater.

To be installed and serviced only by an authorised person

The "authorised installing person" is responsible for:

- Correct installation and commissioning of this appliance.
- Ensuring the appliance performs to the specifications stated on the rating label.
- Demonstrating the operation of the appliance to the customer before leaving.
- Handing the operating instructions to the customer.

THIS APPLIANCE IS NOT SUITABLE FOR POOL OR SPA POOL APPLICATIONS.

NOT SUITABLE FOR COMMERCIAL BOOSTING OF A WARM WATER RECIRCULATION SYSTEM

Regulations

All local by-laws and regulations pertaining to installation and use of gas appliances must be observed.

This appliance must be installed in accordance with the manufacturers installation instructions, AS/NZS5601, AS/NZS3500, and all Local Building & Gas fitting regulations.

This appliance must not be installed indoors or in an enclosed space. This appliance is approved for outdoor installation only. Do not install this appliance with any modification or alteration.

Failure to install this appliance in accordance with these installation instructions will void the warranty and may create an unsafe situation.

Safety of electrical appliances for domestic use and similar purposes

The following requirements apply in accordance with AS/NZS60335 in order to prevent hazards from occurring when using electrical appliances:

“This appliance can be used by children of 8 years and older, as well as by people with reduced physical, sensory or mental capabilities or lacking in experience and knowledge, if they are supervised and have been given instruction in the safe use of the appliance and understand the resulting dangers. Children must not play with the appliance. Cleaning and user maintenance must not be performed by children without supervision.”

“If the power cable is damaged, it must be replaced by the manufacturer, its customer service department or a similarly qualified person, so that risks are avoided.”

2 Product details

2.1 Declaration of Conformity

The appliance has been tested and certified to Australian Standards.

Model	GWH16/20/26 3 CT E23 F6 L S2405

2.3 Included items

- Gas continuous flow water heater
- Appliance documentation

2.4 Rating plate

The rating plate is located on the outside of the appliance, on the bottom.

The plate specifies the performance of the appliance, approval data and the serial number.

2.5 Description of appliance

- External wall-mounted appliance
- Appliance for operating with natural gas or LPG
- Electronic ignition
- Water flow sensor
- Water valve
- By-pass valve
- Temperature sensors for monitoring the temperature of the incoming and outgoing water of the appliance.
- Safety devices:
 - Flame sensor rod

- Thermal fuse
- Outgoing water temperature sensor
- Electronic control unit
- Air temperature sensor
- Frost-protection device
- Electrical connection: 230 V, 50 Hz

2.6 Optional accessories

- Main remote control
- Bathroom remote control
- Recess Box
- Flue diverters

2.7 Appliance layout

- [8] Hot water outlet
- [9] Cold water inlet
- [10] By-pass valve
- [11] Gas inlet
- [12] Electronic control unit
- [13] Gas valve
- [14] Gas pressure test point
- [15] Ignition electrode
- [16] Heat exchanger

3 Operation instructions

- ▶ Open all the water and gas valves.

CAUTION: Burns!

In the area of the burner, the front may reach high temperatures with a risk of burns in the event of contact.

3.1 Digital display - description

Fig. 2 Digital display

- [1] ON/OFF button
- [2] Programming button
- [3] LCD panel
- [4] Increase button
- [5] Decrease button

3.2 Before commissioning the appliance

CAUTION:

- ▶ The initial start-up of the water heater must be done by an authorised installers who will provide the customer with all the information required for the proper operation thereof.

- ▶ Check that the type of gas indicated on the rating plate is the same as the gas to which the appliance is connected.
- ▶ Plug in the appliance in to the electrical socket and switch on.
- ▶ Open the gas isolation valve of the installation.
- ▶ Open the water isolation valve of the installation.

3.3 Switching the appliance on/off

Switching on the appliance

By default, the heating temperature of the water is:

55 °C preset appliances: 55 °C

50 °C compliant appliances: 50 °C.

- ▶ Press the button .
The screen shows the selected water temperature.

Fig. 3

Switching the appliance off

- ▶ Press the button .

3.4 Temperature control

The temperature indicated on the LCD display matches the pre-selected temperature.

- ▶ Press the buttons and until you reach the new temperature desired.

Fig. 4

8 | Maintenance (only by authorised installers)

Selecting the temperature required, reduces the energy and water consumption.

CAUTION:

The temperature indication on the display is approximate, always confirm with your hand before bathing children or old people.

3.5 Programming button

Setting the water temperature

Fig. 5

- ▶ Press the buttons **+** and **-** to select the temperature to be set.
- ▶ Press the programming button for 3 seconds to set the temperature.

When the display stops flashing, the temperature is set in the memory.

Selecting the preset temperature

To select the preset temperature.

- ▶ Press the programming button for 1 second.

The display shows the temperature previously set and this goes on to be the selected temperature.

3.6 Draining the appliance

NOTICE:

Not draining the appliance when a freezing risk exists may damage components of the appliance.

If draining the appliance is required, the following process should be followed:

- ▶ Shut off the cold water isolation valve on the cold water inlet off the appliance.
- ▶ Open a hot water tap.
- ▶ Remove the connection to the cold water inlet tube.

- ▶ Empty all the water contained inside the appliance.

The installation of a frost protection kit protects the appliance against possible risks of freezing.

3.7 Codes of errors in the display

See table 4 on page 9.

Resetting the appliance

Some of the possible faults may be solved by resetting the appliance:

- ▶ Press the button  for 3 seconds.

3.8 Cleaning the front of the appliance

- ▶ Only clean the front of the appliance with a cloth and some detergent.

Do not use corrosive and/or abrasive detergents.

4 Maintenance (only by authorised installers)

Bosch recommend that to maintain optimum performance from this appliance, servicing should be carried out by suitably licensed persons at intervals not greater than two (2) years.

Maintenance must only be done by an authorised installer.

- ▶ Your appliance should only be attended to by a licensed service technician. To locate your nearest service provider, call:
AU 1300 30 70 37, NZ 0800 54 33 52

5 Troubleshooting

Fitting, maintenance and repair must only be carried out by authorised technicians. The following table describes the possible solutions.

Display	Description	Possible solution
A0	Cold and hot temperature sensor damaged.	<ul style="list-style-type: none"> ▶ Check temperature sensor and associated connections. ▶ If the problem persists, call an authorised service technician.
A1	Temperature inside the water heater housing is high (heat exchanger calcified or sooted).	<p>The appliance automatically regulates its performance to avoid overheating.</p> <ul style="list-style-type: none"> ▶ If the problem persists, call an authorised service technician.
A4	Faulty air temperature sensor.	<ul style="list-style-type: none"> ▶ Call an authorised service technician.
A7	Faulty hot water outlet temperature sensor.	<ul style="list-style-type: none"> ▶ Check temperature sensor and associated connections. ▶ If the problem persists, call an authorised service technician.
A9	Hot water outlet temperature sensor is not fitted properly. Low incoming gas pressure.	<ul style="list-style-type: none"> ▶ Check temperature sensor and associated connections. ▶ If the problem persists, call an authorised service technician.
C7	Faulty fan.	<ul style="list-style-type: none"> ▶ Check if the fan is properly connected to ECU. ▶ If the problem persists, call an authorised service technician.
CA	Water flow above maximum specified value.	<ul style="list-style-type: none"> ▶ Check incoming water pressure. ▶ Install a pressure limiting valve if necessary.
CF	Blocked flue gas outlet.	<ul style="list-style-type: none"> ▶ Remove dirt or any other impediment in the flue and air inlet.
C1	Air flow insufficient for start-up.	<ul style="list-style-type: none"> ▶ Close and open a hot water tap. ▶ If the problem persists, call an authorised service technician.
E0	Failure of control module.	<ul style="list-style-type: none"> ▶ Unplug the electrical connection for 10 seconds. ▶ Reconnect and restart the appliance. ▶ If the problem persists, call an authorised service technician.
E1	Hot water temperature sensor detects overheating.	<ul style="list-style-type: none"> ▶ Let the appliance cool and try again. <p>If the problem persists, call an authorised service technician.</p>
E2	Faulty inlet water temperature sensor.	<ul style="list-style-type: none"> ▶ Check temperature sensor and associated connections. ▶ If the problem persists, call an authorised service technician.

Table 4

Display	Description	Possible solution
E4	Air temperature sensor detects overheating (leaking combustion products inside the combustion chamber).	<ul style="list-style-type: none"> ▶ Switch off at the power point and remove the plug from the electrical socket. Do not try to Restart the appliance. ▶ Call a service agent immediately.
E9	Activated thermal fuse.	<ul style="list-style-type: none"> ▶ Call an authorised service technician.
EA	Flame not detected.	<ul style="list-style-type: none"> ▶ Check that the gas to the appliance has not been turned off. ▶ Unplug the electrical connection for 10 seconds. ▶ Reconnect and restart the appliance. ▶ If the problem persists, call an authorised service technician.
EE	Modulating solenoid valve disconnected.	<ul style="list-style-type: none"> ▶ Check solenoid connections. ▶ If the problem persists, call an authorised service technician.
EF	Wrong gas connected.	<ul style="list-style-type: none"> ▶ Call an authorised service technician.
F7	A flame is detected although the appliance is switched off.	<ul style="list-style-type: none"> ▶ Unplug the electrical connection for 10 seconds. ▶ Reconnect and restart the appliance. ▶ If the problem persists, call an authorised service technician.
F9	Safety solenoid valve disconnected.	<ul style="list-style-type: none"> ▶ Call an authorised service technician.
FA	Fault in the gas control valve.	<ul style="list-style-type: none"> ▶ Call an authorised service technician.
FC	Buttons stuck in a 'pressed' position for more than 30 seconds.	<ul style="list-style-type: none"> ▶ Release the button. ▶ If the problem persists, call an authorised service technician.
With indication,   but without existence of solar thermal system.	The temperature selected is lower than the minimum power that the appliance supplies.	<ul style="list-style-type: none"> ▶ Increase the hot water flow.
With indication   and water temperature low.	High incoming water temperature or low flow rate can create this occurrence.	<p>-or-</p> <ul style="list-style-type: none"> ▶ Select a higher temperature. <p>If the problem persists:</p> <ul style="list-style-type: none"> ▶ Call an authorised service technician.
	Appliance is making resonance noise (vibration).	<ul style="list-style-type: none"> ▶ Call an authorised service technician.

Table 4

Note: breakdowns diagnosed by the water heater through an indication in the LCD panel result in the blocking of the appliance for safety reasons. Once the problem is solved, you can reset the appliance by pressing the on/off button or by unplugging and replugging the power supply cord.

To locate your nearest service agent, call: AU 1300 30 70 37, NZ 0800 54 33 52.

6 Environment considerations

Environmental protection is a fundamental corporate strategy of the Bosch Group.

The quality of our products, their efficiency and environmental safety are all of equal importance to us and all environmental protection legislation and regulations are strictly observed.

We use the best possible technology and materials for protecting the environment taking into account of economic considerations.

Packaging

We participate in the recycling programmes of the countries in which our products are sold to ensure optimum recycling.

All of our packaging materials are environmentally friendly and can be recycled.

Used appliances

Used appliances contain valuable materials that should be recycled.

The various assemblies can be easily dismantled and synthetic materials are marked accordingly. Assemblies can therefore be sorted by composition and passed on for recycling or disposal.

7 Water quality

All Bosch water heating appliances are constructed from high quality materials and components and all are certified for compliance with relevant parts of Australian and New Zealand gas, electrical and water standards.

Whilst Bosch water heaters are warranted against defects, the warranty is conditional upon correct installation and use, in accordance with detailed instructions provided with the heater. In the case of the water supplied to the heater, it is important that the water quality be of an acceptable standard.

The water quality limits/parameters listed in water quality table are considered acceptable and generally, Australian and New Zealand suburban water supplies fall within these limits/parameters.

In areas of Australia and New Zealand where water may be supplied, either fully or partly, from bores, artesian wells or similar, one or more of the important limits may well be exceeded and the heater could, therefore, be at risk of failure.

Where uncertainty exists concerning water quality, intending appliance users should seek a water analysis from the water supplying authority and in cases where it is established that the water supply does not meet the quality requirements of the water quality table, the Bosch warranty would not apply.

Water quality table

Maximum levels

pH	Saturation Index (LSI) (Langelier)	Total Hardness	Chlorides	Sodium	Iron
6.5-9.0	+0.4 to -1.0 at 65 °C	200 mg/l	250 mg/l	180 mg/l	1 mg/l

Table 5

8 Warranty details

Robert Bosch (Australia) Pty Ltd (Bosch) Manufacturer's Warranty (Applicable for purchases from 1 January 2012)

All Bosch hot water units are carefully checked, tested and subject to stringent quality controls.

1. Warranty

Bosch offers, at its option, to repair or exchange this Bosch hot water unit or the relevant part listed in clause 2 below at no charge, if it becomes faulty or defective in manufacture or materials during the warranty period also stated in clause 2. This warranty is offered in addition to any other rights or remedies held by a consumer at law.

2. Warranty periods & coverage

- (a) Domestic applications: 3 years (parts and labour)
- (b) Heat exchangers used in domestic applications: 12 years (parts only)
- (c) Commercial applications: 12 months (parts and labour)
- (d) Heat exchangers used in commercial applications: 12 months (part and labour)

All warranty periods commence on the date of purchase of the hot water unit by the end-user. However, where the date of purchase by the end-user is more than 24 months after the date of manufacture, all warranty periods will automatically commence 24 months after the date of manufacture.

3. Warranty exclusions

This warranty is VOID if any damage to or failure of the hot water unit is caused wholly or partly by:

- (a) faulty installation
- (b) neglect, misuse, accidental or non-accidental damage, failure to follow instructions
- (c) use of the unit for purposes other than which it was designed or approved
- (d) unauthorised repairs or alterations to the unit without Bosch's consent
- (e) use of unauthorised parts and accessories without Bosch's consent
- (f) use of non-potable water or bore water in the hot water unit (see product instructions for further details)
- (g) continued use after a fault becomes known or apparent.

This warranty DOES NOT include:

- (a) costs of consumables or accessories
- (b) wear and tear, normal or scheduled maintenance
- (c) to the extent permitted by law, any damage to property, personal injury, direct or indirect loss, consequential losses or other expenses
- (d) changes in the condition or operational qualities of the hot

water unit due to incorrect storage or mounting or due to climatic, environmental or other influences.

NOTE: Any service call costs incurred by the owner or user of the hot water unit for any matter not covered by the terms of this warranty will not be reimbursed by Bosch, even if those costs are incurred during the warranty period. If the hot water unit is located outside the usual operating area of a Bosch service agent, the agent's travel, freight or similar costs are not covered by this warranty and must be paid by the owner or user of the hot water unit.

4. Warranty conditions

- (a) Proof of purchase may be required.
- (b) The hot water unit must be installed by an authorised and licensed installer.
- (c) Proof may be required of the date of installation and correct commissioning of the hot water unit has been carried out to Bosch's satisfaction (such as a certificate of compliance).
- (d) Repair or replacement of the hot water unit or any parts under this warranty does not lengthen or renew the warranty period.
- (e) This warranty is not transferable and is only offered to the original purchaser of the hot water unit.
- (f) No employee or agent of Bosch is authorised to amend the terms of this warranty.
- (g) This warranty only applies to Bosch hot water units purchased from an authorised reseller and installed in Australia or New Zealand.
- (g) To the extent that any condition or warranty implied by law is excludable, such condition or warranty is excluded.

5. How to lodge a warranty claim and warranty procedure

- (a) Warranty claims must be made with the Bosch Customer Contact Centre (Australia: ph 1300 307 037; New Zealand: ph 0800 543 352). Please be ready to provide the model and serial numbers, date of installation, purchase details and a full description of the problem. Warranty claims must be made before the end of the warranty period.
- (b) All warranty service calls must be conducted by an authorised Bosch service agent.
- (c) Invoices for attendance and repair of a hot water unit by third parties not authorised by Bosch will not be accepted for payment by Bosch.

6. Privacy Act 1988 (Cth)

A customer's personal information collected during warranty claims may be used for the provision of customer support, for the provision of information about products and services and for other marketing activities undertaken by Bosch and its Bosch Service Agents who are authorised to carry out warranty repairs on behalf of Bosch (Purpose). Bosch is committed to protecting the privacy of its customers' personal information. It will act in compliance with the National Privacy Principles and

Privacy Act 1988 (Cth). Bosch will not forward customers' personal information to third parties other than for the Purpose. A customer can object at any time to the use of their personal information for the Purpose. Bosch will cease to use a customer's personal information accordingly if an objection is made.

7. Bosch contact details

If you have any questions about this warranty or to lodge a warranty claim, please contact:

Robert Bosch (Australia) Pty Ltd
1555 Centre Road, Clayton, Victoria 3168
Tel: Australia: 1300 307 037
Tel: New Zealand: 0800 543 352

IMPORTANT NOTE FOR AUSTRALIAN CONSUMERS

Our goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement or refund for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have the goods repaired or replaced if the goods fail to be of acceptable quality and the failure does not amount to a major failure.
